SUMMARY

Highly driven engineering student with a year of object-oriented programming experience, skilled in applying engineering ideas to solve complex problems. Quick to learn new techniques and incorporate industry best practices. Demonstrates strong time management and has successfully completed software projects in team environments. Eager to contribute to a dynamic engineering team.

EXPERIENCE

Infosys Springboard AI intern	Oct '24 — Dec '24
Project: <i>From Alt Text to Real Context with AI</i>	
- Built AI models using machine learning and NLP to generate alt-text with ~90% relevance, improving accessibility tagging for image datasets. - Analyzed existing approaches, proposed performance improvements, and collaborated with mentors to successfully complete all project deliverables on Infosys platforms. Skills: Image-to-text generation, NLP, Python, ML model development, team collaboration.	

EDUCATION

Bachelor of Engineering in Computer Science , Chandigarh University (GPA: 7.24*)	Jan '22 — Present
Intermediate in MPC , Sri Chaitanya Junior Kalasala (GPA: 95%)	Jan '20 — Dec '22
Secondary Education in Language Subjects , St. Ann's High School (GPA: 97%)	Jan '14 — Dec '20

CERTIFICATIONS

Microsoft Azure AI Fundamentals , Microsoft	Jun '24
Oracle Infrastructure for Generative AI , Oracle	Aug '24
Predictive Analytics using IBM SPSS Modeler - Advanced Course , IBM	Nov '24
Artificial Analyst , IBM	Apr '25

PROJECTS

Facial Emotion Detection Technique Using Neural Networks , Chandigarh University Link	Jul '25 — Nov '25
- Built and trained a neural network-based facial emotion recognition system using self-collected image samples, applying image preprocessing and feature extraction techniques. - Classified multiple emotions (happy, sad, angry, surprise, neutral) and demonstrated real-world applications of deep learning and computer vision.	
Sentiment Analysis for Political Campaigns , Chandigarh University Link	Jan '25 — Apr '25
- Performed sentiment analysis on Indian Election Tweets (2019) using machine learning models (Decision Tree, Logistic Regression, Naive Bayes, XGBoost, Linear SVC) with TF-IDF and Bag-of-Words feature extraction. - Achieved 93.4% accuracy using Decision Tree with TF-IDF, after data cleaning and preprocessing, and evaluated models using precision-recall metrics with scope for future enhancement using BERT and multilingual models.	
Comparative Analysis of Various SMOTE Techniques on Lung Cancer , Chandigarh University Link	Jan '24 — Apr '24
- Applied advanced oversampling techniques including SMOTE, SMOTE-ENN, and SMOTE-Tomek Links to address class imbalance in lung cancer datasets, reducing noise and improving decision boundary quality. - Utilized Borderline-SMOTE and ADASYN to generate samples near decision boundaries and hard-to-classify regions, enhancing classifier sensitivity and overall predictive performance.	

PUBLICATIONS
